

Dosch Design presents free Tutorials und Samples

(October 27, 2009) The new Dosch Design segment "Dosch Samples & Tutorials" has been created in order to support users in the optimal use of Dosch Design products, and for identifying solutions for specific task requirements. Delivered and presented by well-known experts, these English & German Tutorials are immediately available for illuminating complex work processes. The Tutorials are perfect for CG-novices, but will also offer a multitude of tips for advanced and professional users. Best of all, they can be downloaded anytime from our Homepage.

The Tutorial series starts with several interesting topics like use of animated or non-animated Viz-Images in a scene, and specifically how to obtain very realistic results through changes in lighting and shadows. Besides there is a demonstration how "Rigged Humans for Cinema 4D" are properly used, and how Humans V2 can be animated with Cinema 4D, Maya, Softimage or 3D Studio Max.

Furthermore Dosch Design provides basic information on working with HDRI, like how highlight-reflection and realistic illuminations are created, and how objects like spheres, cars and figures can be integrated in a HDRI environment. Realistic reflections and shadows can be achieved with the help of Cinema 4D. Also included in this Tutorial are settings of a simple scene background and a photo-studio.

Dosch Design has additional Tutorials on the drawing board, lending a hand with interesting and sometimes challenging topics. Quicker and better results are possible with proper guidance. Visit the homepage for useful details. Besides the Tutorials it provides numerous test-samples for various products - free of charge.

About Dosch Design

DOSCH DESIGN develops demand-inspired computer graphics products for professional use in the areas of 3D-design, visualization, animation, movies/TV and desktop publishing. In this endeavor Dosch Design has been translating its high design and quality aspirations into cutting-edge CG-productivity tools at a fair price. Dosch Design products are license-free and commercial use is covered with their purchase.
